Proposal #25916
Created: 07/24/2024
From: Dalton Raubunas

Proposal For

Dale Hathaway

2648 Camille Dr
Palm Harbor, FL 34684

main: 808-780-2573
dhath12@gmail.com

Location

2648 Camille Dr
Palm Harbor, FL 34684

Terms

Due Upon Completion

2648 Camille Dr 34684

ITEM DESCRIPTION	SPECIES	DBH	TREE RATING	AMOUNT
------------------	---------	-----	-------------	--------

1,2) Permit -

\$ 150.00

Obtain permit for removal of tree(s). The price below can cover several trees but the price could go up if the client wants to remove multiple trees. Additionally, if a commercial permit is required it may cost additional. ROW permits, DOT permits and other fees are not covered under this line item and will cost additional if your municipality requires it.

1,2) Crane Service (55 ton articulated crane) -

\$ 750.00

Crane service is necessary to safely and efficiently remove the tree thereby reducing the chances of damaging property. Traditional rigging practices incorporate using blocks and ropes in order to lower large sections of wood to the ground. Cranes can lift up very slowly and carefully which can take some of the factors out of the equation that are hard to control. There is a four hour minimum for this crane. Time begins when crane leaves port and when it arrives back at port. Each subsequent hour after is \$160 per hour unless stated otherwise on the proposal.

****Cranes are very heavy and as a result they can crack driveways, pipes and other underground utilities. We will do our best to ensure this does not happen by laying down plywood and cribbing to disperse weight, however, should such damage occur this would be an additional cost to fix and isn't covered by O'Neil's Tree Service or a crane rental service.**

****Occasionally, if it is safe, we may perform your tree removal without a crane even when there is a line item indicating we will be using a crane. Cranes generally make the removal faster. This allows us to get to more jobs allowing us to be able to service more people. When our crane is down for service or on other job sites we may have to do your job without the assistance of the crane. This will cause us to take longer on the job and doesn't offer any savings as a result. In some cases, not having the crane on site will actually cost us more than having the crane onsite as labor is our largest cost.**

1) Tree Removal -

Oak, Laurel

\$ 1,900.00

Remove tree to as close to grade as possible. Typically this is 3"-6" above grade. Bigger stumps with larger root flares are likely to be as much as 12" or more above grade.

**Removal of debris is not included in this price.

**Pruning and removing trees can be very hard on turf and landscaping. In an effort to keep the cost of providing tree care and removal services to you at more affordable rates, we utilize machinery to do the work of many men. This ultimately saves you money. For this reason, when we are working on your property, we will utilize machinery. This can cause damage to turf including rutting and turf dieback. If you are concerned about this, we will be happy to provide an amended proposal (costs more) to add ground protection such as plywood or to remove debris by hand thereby reducing the chances of this type of damage.

**If your proposal is not amended to account for turf or landscape preservation, we will not be responsible for the cost of damages to your landscape.

2) Tree Removal -

Oak, Laurel

\$ 3,650.00

Remove tree to as close to grade as possible. Typically this is 3"-6" above grade. Bigger stumps with larger root flares are likely to be as much as 12" or more above grade.

**Removal of debris is not included in this price.

**Pruning and removing trees can be very hard on turf and landscaping. In an effort to keep the cost of providing tree care and removal services to you at more affordable rates, we utilize machinery to do the work of many men. This ultimately saves you money. For this reason, when we are working on your property, we will utilize machinery. This can cause damage to turf including rutting and turf dieback. If you are concerned about this, we will be happy to provide an amended proposal (costs more) to add ground protection such as plywood or to remove debris by hand thereby reducing the chances of this type of damage.

**If your proposal is not amended to account for turf or landscape preservation, we will not be responsible for the cost of damages to your landscape.

1,2) Stump Grinding (Standard) -

Stump

\$ 650.00

Grind stump to just below grade. If deep grinding is required to be able to plant a new tree, it will be an additional cost. All stump grinding includes an 811 LOCATE to reduce chances of damaging

utilities. Any damage to underground utilities such as irrigation and low-voltage electrical will be an additional cost.

O'Neil's will smooth out the area when done and blow off area unless listed otherwise here. THIS COULD RESULT IN A LARGE HUMP IN THE YARD WHEN DONE. Hauling away mulch from grinding the stump will be addressed in a separate line item below.

****When grinding stumps, underground utilities (such as the ones mentioned above), can be damaged and will cost extra to fix.**

*****If surface root grinding is required it will be an additional cost.*****

Please note that stump grinding may be done at a later date from when other tree work on your proposal is done. If this is the case, grinding will be done on short notice. Our technician will call to notify you when he is in route to your property.

****Stump grinding may be done at a later date depending on current work load and backlog. Additionally, grinding may also be done on short notice, but you will receive a phone call from an O'Neil's stump grinding technician when they are on their way to perform the task. This is the only item which we very rarely may subcontract to a stump grinding professional. The only reason for this being that we are behind schedule or our own stump grinders are being repaired. This subcontractor has been fully vetted and carry's all state required insurances necessary to perform his task.**

****Pruning and removing trees can be very hard on turf and landscaping. In an effort to keep the cost of providing tree care and removal services to you at more affordable rates, we utilize machinery to do the work of many men. This ultimately saves you money. For this reason, when we are moving debris on your property, we will utilize machinery. This can cause damage to turf including rutting and turf dieback. If you are concerned about this, we will be happy to provide an amended proposal (costs more) to add ground protection such as plywood or to remove debris by hand thereby reducing the chances of this type of damage.**

****If your proposal is not amended to account for turf or landscape preservation, we will not be responsible for the cost of damages to your landscape.**

1,2) Mulch Hauling From Grinding -

Stump

\$ 300.00

When you grind a stump it leaves behind a pile of mulch and dirt. We can haul this off to level with grade and rake level/flat or to taper of natural grade when done.

****When this is done the area will still have mulch on the surface and it will look a bit messy. Bringing this site back to what it looked**

like before we ground the stump will cost extra on top of this line item as this line item is meant to get it to the point where grass can be re laid over top.

**This should allow the area to be prepared for installation of new sod.

**Keep in mind that over the next few months to a year that the area will compact and you may have a sunken area. This can be remedied by you (the client) by adding a bit of soil or sand to the area at a rate of 1" every few months until the sod recovers in the area.

**Pruning and removing trees can be very hard on turf and landscaping. In an effort to keep the cost of providing tree care and removal services to you at more affordable rates, we utilize machinery to do the work of many men. This ultimately saves you money. For this reason, when we are moving debris on your property, we will utilize machinery. This can cause damage to turf including rutting and turf dieback. If you are concerned about this, we will be happy to provide an amended proposal (costs more) to add ground protection such as plywood or to remove debris by hand thereby reducing the chances of this type of damage.

**If your proposal is not amended to account for turf or landscape preservation, we will not be responsible for the cost of damages to your landscape.

1,2) Debris Removal -

\$ 300.00

Haul away and recycle debris.

**IN AN EFFORT TO KEEP INCREASING COSTS DOWN ON THIS SERVICE SOME PILES MAY SIT FOR A COUPLE DAYS BEFORE BEING HAULED AWAY. Please let us know if this will cause you problems or if you have any limitations regarding this part of the service.

**Pruning and removing trees can be very hard on turf and landscaping. In an effort to keep the cost of providing tree care and removal services to you at more affordable rates, we utilize machinery to do the work of many men. This ultimately saves you money. For this reason, when we are moving debris on your property, we will utilize machinery. This can cause damage to turf including rutting and turf dieback. If you are concerned about this, we will be happy to provide an amended proposal (costs more) to add ground protection such as plywood or to remove debris by hand thereby reducing the chances of this type of damage.

**If your proposal is not amended to account for turf or landscape preservation, we will not be responsible for the cost of damages to

From: Dalton Raubunas

your landscape.

O'Neil's Tree Service
PO Box 492
Ozona, FL 34660

Proposal #25916
Created: 07/24/2024
From: Dalton Raubunas

***This estimate/proposal does not serve as an assessment of the overall condition or risk of your trees. Trees are living things, circumstances and conditions can change rapidly creating an unacceptable or higher risk. Trees with targets of people and/or property should be assessed and/or monitored for changes by an ISA Certified Arborist.*

***O'Neil's Tree Service provides monitoring and/or risk assessments appropriate for the current situation at an additional cost. A risk assessment may include Level 3 Advance Assessment arboriculture equipment and/or methodology.*

***Stump grinding and excavation can damage underground utilities such as irrigation, electrical and water. Such damages will be an additional cost to fix. Upon your request we can arrange such repairs with an appropriate licensed and insured contractor and attach the repair bill to the final invoice.*

***All work will be performed in accordance with the ANSI Z133 safety standards for tree care and the ANSI A300 standards for pruning.*

***If no pruning specification is stated on a line item, the general pruning specification will apply: No cuts larger than 3" diameter and no more than 30% of live foliage removed from an individual limb or branch.*

***Client responsibilities: Please help us by communicating your needs and expectations to our estimator. Please don't assume that we will do certain things not mentioned or itemized here as tree care is always done for specific reasons. Unfortunately, we don't currently employ mind readers:) If you don't see items discussed or which are important to you mentioned or itemized on this proposal, they WILL NOT be performed at no cost and you are expected to pay the full price for the services delivered as per this proposal. Optional fields must be selected if the client would like to have them done and if we must come back to perform such services after the fact they will often cost more money than quoted on the this proposal as it will require a separate trip etc.*

***If the total of your proposal is less than \$1000 we will show up to perform the work unannounced at our discretion. This allows us to keep the routes of our crews optimized so we can deliver the best quality tree care at affordable prices. If the work cannot be performed due to vehicles being in the way or otherwise we will be back to perform the work at our convenience.*

O'Neil's Tree Service acknowledges and the client agrees that it is the client's responsibility to ascertain whether a tree is located on the property where services are to be rendered prior to the commencement of work by O'Neil's Tree Service. O'Neil's Tree Service shall not be held liable for any inaccuracies or omissions in determining property boundaries or tree ownership. Additionally, O'Neil's Tree Service is not responsible for resolving any disputes with neighboring property owners or managers regarding the arboricultural work conducted on behalf of the client. Any disagreements or conflicts arising from such work shall be the sole responsibility of the client to address and resolve.

SUBTOTAL	\$ 7,700.00
SALES TAX	\$ 0.00
TOTAL	\$ 7,700.00

Oak

TERMS AND CONDITIONS

The following terms and conditions are a part of the confirmation of work to be performed by O'Neil's Tree Service and with the information on the front constitute the whole agreement.

Types of Pruning:

Crown Cleaning - Removal of detached, broken, dead and diseased branches especially those more than one inch in diameter.

Crown Reduction or Reduction Pruning - This type of pruning is used to reduce the size of a tree by decreasing the length of one or many stems and branches.

Crown Thinning - Thinning should result in an even distribution of branches along individual limbs, not a grouping towards the ends. Do this by removing some of the branches from the edge of the canopy, not from the interior! Caution must be taken not to create an effect known as lions-tailing, which is caused by removing an excessive number of interior lateral branches or limbs and foliage. Before thinning a tree a crown cleaning must be done. Appropriately thinned trees may not look like they were pruned.

Structural Pruning - Structural pruning will increase structural integrity by pruning to one dominant leader. This is done by reducing the length of or removing competing leaders. Do not allow weakly attached branches to grow too long because they could split from the tree.

Crown Raising or Crown Elevation - Instead of removing large low branches all at once, slow their growth by reducing their length so they can be removed later without stressing the tree. Raising is also done by removing smaller branches at the branch tips which are growing downward or weighing the branch down.

Scheduling :

Work crews will arrive at the job site unannounced unless otherwise indicated. O'Neil's Tree Service shall attempt to meet all performance dates, but shall not be held responsible for delays due to inclement weather, response to disasters or other conditions beyond our control.

Workmanship :

All work will be performed in a professional manner by experienced personnel outfitted with appropriate tools and equipment to complete the job properly.

Driveway damage :

O'Neil's Tree Service is not responsible for damage to driveways caused by the weight of our trucks or machinery. This damage rarely occurs and is very dependant on the construction process used to install your driveway. If you do not wish us to use your driveway, let us know beforehand and we will be happy to give you a revised estimate to perform the work manually.

Lawn damage :

O'Neil's Tree Service will make reasonable attempts to prevent damage to your lawn. Falling limbs, wood, trucks, and machinery may cause damage to lawn. While we will make efforts to prevent this damage, we do not repair damage to lawns.

Insurance :

O'Neil's Tree Service is insured for liability resulting from injury of persons or property, and all employees are covered by Workers Compensation Insurance. Proof will be provided upon request.

Ownership :

The customer warrants that all trees, plant material and property upon which work is to be performed are either owned by the customer or permission for the work has been obtained by the owner. O'Neil's Tree Service is to be held harmless from all claims for damages resulting from failure to obtain such permission.

Terms of payment :

All accounts are payable upon receipt of the invoice. A service charge of 1.5% per month, which is an annual percentage rate of 18% will be added to accounts thirty days after invoice date. If outside assistance is used to collect the account, the customer is responsible for all costs associated with the collecting.

Access to work :

Customer shall provide free access to work areas for O'Neil's Tree Service employees and vehicles and agrees to keep driveways clear and available for the movement and parking of required equipment during normal working hours. O'Neil's Tree Service shall not be expected to keep gates closed for animals or children.

Concealed contingencies :

Customer agrees to pay O'Neil's Tree Service on a time and material basis or an additional agreed upon amount in the event additional work impossible to foresee is needed to complete the job. This would include, but is not limited to, concrete or other foreign matter within the tree, stinging insects or nests, rocks, pipe, underground lines or any other condition not apparent in estimating the job.

Stump removal :

Stumps will be cut to within approximately six (6) inches of ground level unless specified to the contrary on the face page of this agreement. Stump removal is not included in this agreement unless specifically provided for on the face page hereof. If the customer request deep grinding, 811 must be called prior to grinding and an additional cost will be added for the additional grinding. It is not part of our normal service to haul away the wood chips from stump grinding, but we can haul them away at an additional cost. **We are not responsible for damage to underground utilities or irrigation components. Stump grinding can damage underground utilities, such as irrigation, internet, water lines, etc. O'Neil's LLC is not responsible for this damage, but we can arrange to have this repaired by a licensed and insured contractor at an additional cost in the event it does occur and attach the cost to the final invoice. You must understand and agree to this before any stump grinding work is performed. Initial here _____**

Length of validity :

This contract is valid for 90 days only.

\$50.00 OFF NOW

Rating Category		Conditional components		Percent rating	Scale of 1-6
	Health	Structure	Form		
Excellent	High vigor and nearly perfect health with little or no twig dieback, discoloration, or defoliation.	Nearly ideal and free of defects.	Nearly ideal for the species. Generally symmetric. Consistent with the intended use.	<80% to 100%	5
Good	Vigor is normal for the species. No significant damage due to diseases or pests. Any twig dieback, defoliation, or discoloration is minor.	Well-developed structure. Defects are minor and can be corrected.	Minor asymmetries/deviations from species norm. Mostly consistent with the intended use. Function and aesthetics are not compromised.	<60% to >81%	4
Fair	Reduced vigor. Damage due to insects or diseases may be significant and associated with defoliation but is not likely to be fatal. Twig dieback, defoliation, discoloration, and/or dead branches may compromise up to 50% of the crown.	A single defect of a significant nature or multiple moderate defects. Defects are not practical to correct or would require multiple treatments over several years.	Major asymmetries/deviations from species norm and/or intended use. Function and/or aesthetics are compromised.	<40% to >61%	3
Poor	Unhealthy and declining appearance. Poor vigor. Low foliage density and poor foliage color are present. Potentially fatal infestation. Extensive twig and/or branch dieback.	A single serious defect or multiple significant defects. Recent change in tree orientation. Observed structural problems cannot be corrected. Failure may occur at any time.	Largely asymmetric/abnormal. Detracts from intended use and/or aesthetics to a significant degree.	<20% to >41%	2
Very Poor	Poor vigor. Appears to be dying and in the last stages of life. Little live foliage.	Single or multiple severe defects. Failure is probable or imminent.	Visually unappealing. Provides little or no function in the landscape.	<5% to >21%	1
Dead				>6%	0
