Oh, the places we've been. The wonder. The awe.

Beyond my imagining. Maybe yours as well

It should be **awesome** for one and all

To pass this way but once,

no practice, no do-overs, this one time

to make a song from chance and chaos, mis-direction and purpose,

This, this is our song.

"This is my song, O God of all the nations,

a song of peace for lands afar and mine;

this is my home, the country where my heart is;

here are my hopes, my dreams, my holy shrine:

but other hearts in other lands are beating

with hopes and dreams as true and high as mine."[1]

MP birthday

The year:

- 72: 9*8; 3^2 times 2/4/6/8; last year
- this year you become 73: https://en.wikipedia.org/wiki/73_(number)

73 is the 21st prime number, and forms the eighth twin prime with 71. It is an emirp and permutable prime with 37;[1] while 73 and 37 are both sexy primes twice over

73 as a star number (up to blue dots). 37, its dual permutable prime, is the preceding consecutive star number (up to green dots) within the sequence of star numbers.[2] Most notably, 73 is the sole Sheldon prime to contain both mirror and product properties.[3] 73, as an emirp, has 37 as its dual permutable prime, a mirroring of its base ten digits, 7 and 3. 73 is the 21st prime number, while 37 is the 12th, a second mirroring. 73 has a prime index of 21 = 7 x 3; a product property where the product of its base-10 digits is precisely its index in the sequence of primes.

NFL: In the 1940 NFL championship game, the Bears beat the Redskins 73–0, the largest score ever in an NFL game. (The Redskins won their previous regular season game, 7–3).
